Leverage the power of Nutanix with ease

100% application focus

No more partially backed-up applications. HYCU makes your VMs transparent by auto discovering your applications. Get application-aware, granular, wizard-driven restores.

Natively integrated

Eliminate complexity and silos by making data protection a natural extension to Nutanix AOS. HYCU's familiar Nutanix look and feel makes it a breeze to use. HYCU is built to be hypervisor agnostic and currently supports AHV and ESX.

Storage level snapshots

HYCU leverages the power of Nutanix Storage-level snapshots via the v3 API to deliver no-impact backup and rapid recovery. And uses Nutanix change block tracking APIs to deliver the best RPO with incremental forever strategy.

“

Thousands of companies rely on Nutanix to deliver the agility and economics of the public cloud without sacrificing the security and control of on-premises infrastructure. HYCU has developed a powerful solution that aligns with our design philosophy of consumer-grade simplicity. HYCU will give customers the flexibility and choice of converging all their data management onto the Nutanix Enterprise Cloud Platform.

Sunil Potti,

Chief Product & Development Officer
at Nutanix

”

“

With HYCU, it was love at first sight. Its simplicity, elegance and power make it the ideal backup and recovery solution for Nutanix.

Ben Sharp,

Infrastructure Manager and Solutions
Architect at Intuit Technologies
